

Boots- and Shoe Dryer Mistral

for the Industry

Heute
Maschinenfabrik

Motivate your staff...

...with dry shoes
over night.

Two dryers can be mounted against towards one another onto a movable frame.

HEUTE-drying equipments are completely manufactured out of stainless steel in highest quality. The motors with warm air blower built in, which are very strong and maintenance free are drying the shoes and boots carefully, by means of an adjustable preset timer. The warm air circulates inside the shoes. (Room temperature +25°C/within approx. 1-2 hours).

Per example: You are starting the blower at 1.00 h in the night and in the morning your staff will have dry shoes.

If you choice the movable doublesided version or the sturdy wall version, in every case the mounting by means of 4 fastening screws is very simple. (Fastening material is attached).

The system permits an extension to max. 4 drying units, over a 230 volt plug.

The Mask Dryer Mistral 8 provides dry protection masks within 1-2 hours after washing.

The **automatic preset timer** is protected against not permitted contact into the pre-programmed flow by means of an anti-dim cover. At the 24 hours scale the time of running of the warm air blower can be adjusted easily.

The shoes and boots will be stuck over the curved bow out of stainless steel. The warm air is flowing into the point of the shoes and along the inside of the leg out again.

Up to four of our drying systems can be switched over a 230 Volts plug by means of a **simple plug connection**. Each dryer consists of it's own heater with blower. For each pair of boots **a number** is available, so that your staff can find their boots, which they had put onto the bow in the evening, in the morning very easily, without looking for it a long time.

Possibilities of the Design

Model Mistral 8

Mask Dryer for **8 protection masks**

Art.-Nr. 86-008

Model Mistral 10

Shoe- and boots dryer for **10 Pairs**

Art.-Nr. 86-010

Model Mistral 15

Shoe- and boots dryer for **15 Pairs**

Art.-Nr. 86-015

Undercarriage for 2 Mistral 10

Art.-Nr. 86-602

Undercarriage for 2 Mistral 15

Art.-Nr. 86-603

Technical Datas Mistral 10

Warm air blower: 0,5 kW
Voltage: 230 Volt
Weight: 25 kg (net),
31 kg (gross)
Length: 550 mm
Hight: 1.530 mm
Width: 350 mm

Technical Datas Mistral 15

Warm air blower: 0,5 kW
Voltage: 230 Volt
Weight: 35 kg (net),
41 kg (gross)
Length: 840 mm
Hight: 1.530 mm
Width: 350 mm

Technical Datas Mistral 8

Warm air blower: 0,5 kW
Voltage: 230 Volt
Weight: 10 kg (net),
14 kg (gross)
Length: 740 mm
Hight: 320 mm
Width: 310 mm

Technical chngements reserved.

HEUTE Shoe polishing machines

The company A & W HEUTE was founded in the year 1905.

The first shoe polishing machine for hotel use was built soon and went into series production immediately. Today the production range is very varied. It is ranging from practical hotel and industry shoe cleaning machines over shoe and boots dryers to sole cleaning and washing units.

The family company, which is nearly 100 years old, is expanding worldwide, because it was possible at every time to produce products of highest quality and individuell according to the customer's requirements. Our production and our experience permit us to satisfy nearly all customer's demands.
