

Boots- and Shoe Dryer Mistral

for the hotel

Heute
Maschinenfabrik

Fastidious your guests...

...with dry shoes
over night.

HEUTE-drying equipments are completely manufactured out of stainless steel in highest quality. The motors with warm air blower built in, which are very strong and maintenance free are drying the shoes and boots carefully, by means of an adjustable preset timer. The warm air circulates inside the shoes. (Room temperature +25°C/within approx. 1-2 hours).

Per example: You are starting the blower at 7.00 h in the morning and from 8.00 h in the morning your guests will have comfortable warmed up shoes ! Your house guests will look forward to this extraordinary service every morning.

If you choice the movable doublesided version or the sturdy wall version, in every case the mounting by means of 4 fastening screws is very simple. (Fastening material is attached).

The system permits an extension to max. 4 drying units, over a 230 volt plug.

Two dryers can be mounted against towards one another onto a movable frame.

The **automatic preset timer** is protected against not permitted contact into the pre-programmed flow by means of an anti-dim cover. At the 24 hours scale the time of running of the warm air blower can be adjusted easily.

The shoes and boots will be stuck over the curved bow out of stainless steel. The warm air is flowing into the point of the shoes and along the inside of the leg out again.

Up to four of our drying systems can be switched over a 230 Volts plug by means of a **simple plug connection**. Each dryer consists of its own heater with blower. For each pair of shoes a number is available, so that your guest can find his shoes, which he had put onto the bow in the evening, in the morning very easily, without looking for it a long time.

HEUTE Shoe polishing machines

The company A & W HEUTE was founded in the year 1905.

The first shoe polishing machine for hotel use was built soon and went into series production immediatly. Today the production range is very varied, ranging from the practical shoe polishing machine for the hotel use over machines for the industrial use and over infra-red heaters up to drying systems for the hotels and guests business.

The family company, which is nearly 100 years old, is expanding worldwide, because it was possible at every time to produce products of highest quality and individuell according to the customer's requirements. Our production and our experience permit us to satisfy nearly all customer's demands.
